

The listserve fws-shorebirdmanagement is a cooperative effort of partners of the U. S. and Canadian Shorebird Conservation Plans and is maintained by the U.S. Fish and Wildlife Service. Ultimately, we hope this listserve will help meet management objectives for the conservation of shorebirds. Specifically, the listserve will provide users with: 1) a forum to discuss approaches to managing shorebird habitats, 2) information on shorebird management resources, 3) answers to specific, regional management questions, 4) a forum to discuss regional-scale projects, and 5) technical advice on monitoring shorebirds. To subscribe, send an e-mail indicating a wish to subscribe to Brad_Andres@fws.gov. We hope to occasionally post synopses of topics addressed in the forum on this website.
